EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with June 16, 2005 on Gregory Bernabeo Reg. No. 44,032.

IN THE CLAIMS

Please amend claims 17 and 18.

17. (Currently Amended) A method for upgrading one of a plurality of executable computer programs stored on a server computer in a distributed computing environment, said method comprising:

- instructing a router to stop routing requests for said executable program to said server computer while permitting said router to continue routing requests for other executable computer programs to said server computer by sending a signal to said router identifying said computer program and said server computer, said signal comprising information retrieved from a server list and identifying said computer program;
- waiting until said server computer is no longer supporting a current client request for said executable computer program;

Art Unit: 2157

- after completion of upgrading of said executable computer program, instructing said router to begin routing requests for said executable computer program to said server computer.

18. (Currently Amended) The method of claim 17, wherein said router is a packet-switching router.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: the closest prior art of record (Jiang et al., U.S. Patent No. 6,453,354) does not teach nor suggest in detail preventing said server computer from servicing requests for an upgrade-ready computer program sending a signal to stop routing requests for only said upgrade-ready program to said server computer, said server computer storing a plurality of computer programs, said plurality of computer programs including said upgrade-ready computer program in combination with all the elements of the independent claims as argued by the Applicants. Applicants' arguments have been considered persuasive, in light of the claim limitations as well as the enabling portions of the specification.

3. The dependent claims further limit the independent claims and are considered allowable on the same basis as the independent claims as well as for the further limitations set forth.

Any comments considered necessary by applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
